JSpiders, Bangalore

Dec 2022 - Present

PROJECTS

Library management web app

Mar 2023 - Apr 2023

<https://github.com/Peeyusj/Libmngapp>

This web application is built using Reactjs library (react routers) and let's client enter as user or admin , admin has multiple features like adding and removing book ,users with completely custom css

Foodx(food ordering webapp) Reactjs FE-UI

Jan 2023 - Jan 2023

https://github.com/Peeyusj/foodx_reactjs

Populating elements using API or dummy json file , I made an E-com web application with added functionality like adding and removing items with modal and same project with using react router

Rock paper scissors Game (single player) with good ui

Sep 2022 - Sep 2022

<https://github.com/Peeyusj/Sps-Game>

Rock paper game is one of the most important project for me I made it from the beginning by taking help from Odin project then proceeded to further and it uses vey simple arithmetical logics and a good portion of JavaScript

My library app by appending HTML and using modals

Aug 2022 - Aug 2022

<https://github.com/Peeyusj/library>

User can add books to read and check the progress how many pages to read gow many books to read with cool animations

Netflix home page clone

Mar 2023 - Present

<https://peeyusj.github.io/neflixcln/>

Using multiple react hooks React router and with custom css I made Netflix clone ,it lets user add movie in my list using Local store.

A video carousel with complete custom css is at the bottom of page and play button let's you play videos in cover.
